

16 SEER HEAT PUMPS FOR R-410A

HRG16 SERIES 2 to 5 Tons

The HRG Series of high efficiency heat pumps comes charged with R-410A, an environmentally friendly refrigerant

Rated up to 16 SEER and 9 HSPF when matched with a Century air handler—see AHRI Directory

- Copper tube/aluminum fin coils are designed for optimal heat transfer while minimizing size and weight
- Full metal jacket of galvanized steel with a polyester urethane finish protects the coil while adding to the attractive appearance; vertical slot configuration adds to jacket stability
- Advanced scroll compressor has two stages of heating and cooling capacities for optimum comfort with virtually silent operation; designed for reliability and long life
- Demand defrost saves energy in heating mode by defrosting only when necessary
- High pressure switch protects against excessively high system pressures; low pressure switch protects the compressor
- Liquid line filter-drier is included for field installation
- Restart time delay eliminates common cause of compressor failures
- Composite base pan is stronger and lighter than steel, resists corrosion and absorbs sound
- Common suction service port lets contractor read suction pressure without removing any panels
- Heavy duty grille assembly makes it easy to access components from top for service without disconnecting fan motor,
- Compressor and control access is conveniently located on the side of the unit to speed installation and service

Outstanding Limited Warranty Coverage—12 years compressor, 12 years other parts!

With registration within 90 days by original owner; other limitations apply: see printed warranty for details.

NOTE: Unit comes charged for 15' line set. Additional charge needed for longer line set lengths, as well as suction line size variations, see IOM.

	ACCESSORIES
PART NO.	DESCRIPTION
912933	Start Assist Kit—provides additional starting torque when operating with lowline voltage or high operating temperatures
920636	Snow Stand Kit
920900	Extreme Wind Condition Mounting Kit

^{*}Requires 1-1/8" to 7/8" reducer from line to unit.

^{**}Use of 3/4" line set will result in approx. 2% loss in capacity.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Third party incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product.

Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.
