

## UVC Germicidal Lights

Powerful control of air-polluting microorganisms

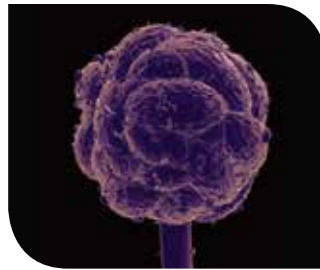

# Germs make everyone uncomfortable

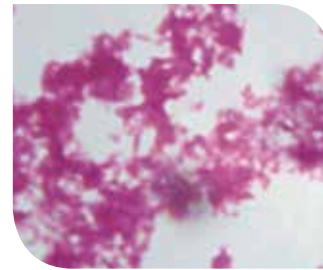

Bacteria

Fungi

Molds

Viruses

## Take comfort in breathing cleaner air

Mold inside your house is not only unsightly—it also pollutes the air your family breathes. Along with the mold spores, your home's air may contain germs like bacteria, fungi and viruses. Complete Comfort™ UV and UVC germicidal lights are designed to greatly reduce concentrations of these microorganisms, letting you breathe comfortably.

## Complete Comfort™ UV and UVC Germicidal Lights

### Simple, Effective Solution

- Designed to improve indoor air quality by killing germs inside your heating and cooling equipment
- Easy installation inside your HVAC duct system
- Effective even when HVAC system isn't running

### Comfort of Clean, Fresh Air

- Powerful UV light destroys harmful microorganisms
- HVAC system can run at maximum efficiency without excess mold and mildew buildup
- 5-year limited warranty guarantees years of dependable comfort

## Signs of contaminated air

- Watery, itchy eyes and nasal congestion
- Headaches, nausea, fatigue
- Persistent cough or cold
- Mold present in HVAC equipment
