Version 2.0

Revision Date 03/30/2015

Ref. 13000000131

This SDS adheres to the standards and regulatory requirements of the United States and may not meet the regulatory requirements in other countries.

### SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name Tradename/Synonym	:	DuPont <sup>™</sup> Freon <sup>®</sup> 23 refrigerant Trifluoromethane R-23 HFC-23
Product Grade/Type	:	ASHRAE Refrigerant number designation: R-23
Product Use	:	Refrigerant, For professional users only.
Restrictions on use Manufacturer/Supplier	:	Do not use product for anything outside of the above specified uses DuPont 1007 Market Street Wilmington, DE 19898 United States of America
Product Information Medical Emergency Transport Emergency	:	+1-800-441-7515 (outside the U.S. +1-302-774-1000) 1-800-441-3637 (outside the U.S. 1-302-774-1139) CHEMTREC: +1-800-424-9300 (outside the U.S. +1-703-527-3887)

### SECTION 2. HAZARDS IDENTIFICATION

Product hazard category Gases under pressure

Liquefied gas

Safety Data Sheet		<b>OUPOND</b>
DuPont <sup>™</sup> Freon <sup>®</sup> 23	refrigerant	
Version 2.0		
Revision Date 03/30/2015	Ref. 13000000131	
Label content Pictogram		
Signal word	: Warning	
Hazardous warnings	: Contains gas under pressure; may explode if heated.	
Hazardous prevention measures	: Protect from sunlight. Store in a well-ventilated place.	

### Other hazards

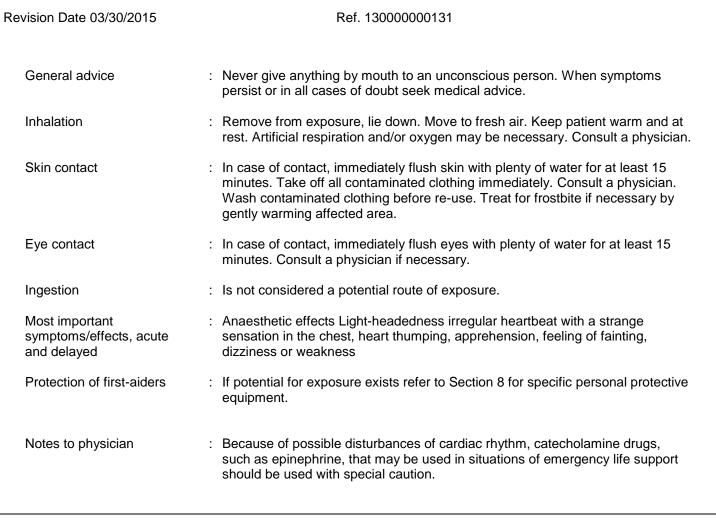

Misuse or intentional inhalation abuse may cause death without warning symptoms, due to cardiac effects., Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing., Rapid evaporation of the liquid may cause frostbite., May cause cardiac arrhythmia.

### SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Component	CAS-No.	Concentration
Trifluoromethane	75-46-7	100 %

### **SECTION 4. FIRST AID MEASURES**

Version 2.0

### SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.	I
Unsuitable extinguishing media	No applicable data available.	
Specific hazards	Hazardous thermal decomposition products: Carbon oxides Hydrogen fluoride Carbonyl fluoride	

Version 2.0

Revision Date 03/30/2015

Ref. 13000000131

		Cylinders are equipped with pressure and temperature relief devices, but may still rupture under fire conditions. Decomposition may occur. Contact of welding or soldering torch flame with high concentrations of refrigerant can result in visible changes in the size and colour of the torch flame. This flame effect will only occur in concentrations of product well above the recommended exposure limit. Therefore stop all work and ventilate to disperse refrigerant vapors from the work area before using any open flames. This substance is not flammable in air at temperatures up to 100 deg. C (212 deg. F) at atmospheric pressure. However, mixtures of this substance with high concentrations of air at elevated pressure and/or temperature can become combustible in the presence of an ignition source. This substance can also become combustible in an oxygen enriched environment (oxygen concentrations greater than that in air). Whether a mixture containing this substance and air, or this substance in an oxygen enriched atmosphere become combustible depends on the inter-relationship of 1) the temperature 2) the pressure, and 3) the proportion of oxygen in the mixture. In general, this substance should not be allowed to exist with air above atmospheric pressure or at high temperatures; or in an oxygen enriched environment. For example this substance should NOT be mixed with air under pressure for leak testing or other purposes. Experimental data have also been reported which indicate combustibility of this substance in the presence of certain concentrations of chlorine.
Special protective equipment for firefighters	:	In the event of fire, wear self-contained breathing apparatus.
Further information	:	Cool containers/tanks with water spray. Water runoff should be contained and neutralized prior to release.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Safeguards (Personnel)	: Evacuate personnel to safe areas. Ventilate area, especially low or enclosed places where heavy vapours might collect.	
Environmental precautions Spill Cleanup	<ul> <li>No applicable data available.</li> <li>There are no special clean-up or disposal requirements for household/industrial spills of this product.</li> </ul>	

Safety Data Sheet	<b>OUPOND</b> ®
DuPont <sup>™</sup> Freon <sup>®</sup> 23 ref	rigerant
Version 2.0	
Revision Date 03/30/2015	Ref. 13000000131
Accidental Release Measures	: Avoid open flames and high temperatures. Self-contained breathing apparatus (SCBA) is required if a large release occurs.
SECTION 7. HANDLING AND ST	ORAGE
Handling (Personnel)	<ul> <li>Avoid breathing high concentrations of vapour. Avoid contact of liquid with eyes and prolonged skin exposure. Use sufficient ventilation to keep employee exposure below recommended limits. Provide sufficient air exchange and/or exhaust in work rooms. For personal protection see section 8.</li> </ul>
Handling (Physical Aspects)	: Vapours are heavier than air and may spread along floors. Contact with chlorine or other strong oxidizing agents should also be avoided.
Dust explosion class	: Not applicable
Storage	<ul> <li>Valve protection caps and valve outlet threaded plugs must remain in place unless container is secured with valve outlet piped to use point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure reducing regulator when connecting cylinder to lower pressure (&lt;3000 psig) piping or systems. Never attempt to lift cylinder by its cap. Use a check valve or trap in the discharge line to prevent hazardous back flow into the cylinder. Cylinders should be stored upright and firmly secured to prevent falling or being knocked over.</li> <li>Separate full containers from empty containers. Keep at temperature not exceeding 52°C. Do not store near combustible materials. Avoid area where salt or other corrosive materials are present.</li> <li>The product has an indefinite shelf life when stored properly.</li> </ul>
Storage period	: > 10 yr
Storage temperature	: <52 °C (< 126 °F)
SECTION 8. EXPOSURE CONTR	OLS/PERSONAL PROTECTION
Engineering controls	: Normal ventilation for standard manufacturing procedures is generally adequate. Local exhaust should be used when large amounts are released. Mechanical ventilation should be used in low or enclosed places. Refrigerant Concentration monitors may be necessary to determine vapor concentrations in work areas prior to use of torches or other open flames, or if employees are entering enclosed areas.

DuPont <sup>™</sup> Freon <sup>®</sup> 23 i	refrigerant
Version 2.0	
Revision Date 03/30/2015	Ref. 13000000131
Personal protective equipn Respiratory protection	nent : Under normal manufacturing conditions, no respiratory protection is required when using this product.
Hand protection	: Additional protection: Impervious gloves
Eye protection	: Wear safety glasses with side shields. Additionally wear a face shield where the possibility exists for face contact due to splashing, spraying or airborne contact with this material.
Protective measures	: Self-contained breathing apparatus (SCBA) is required if a large release occurs.
Exposure Guidelines Exposure Limit Values	
Trifluoromethane AEL *	(DUPONT) 1,000 ppm 8 & 12 hr. TWA
	table Exposure Limit. Where governmentally imposed occupational exposure limits which are n effect, such limits shall take precedence.
SECTION 9. PHYSICAL AND	CHEMICAL PROPERTIES
Appearance Physical state Form Color	: gaseous : Liquefied gas : colourless
Odor	: slight, ether-like
Odor threshold	: No applicable data available.
рН	: neutral
Melting point/range	: No applicable data available.

Boiling point/boiling range : Boiling point -82.0 °C (-115.6 °F)

Version 2.0

Revision Date 03/30/2015	Ref. 13000000131
Flash point	: Method: ASTM D 56 does not flash
Evaporation rate	: No applicable data available.
Flammability (solid, gas)	: The product is not flammable.
Upper explosion limit	: Method: None per ASTM E681
Lower explosion limit	: Method: None per ASTM E681
Vapor pressure	: 46,986 hPa at 25 °C (77 °F)
Vapor density	: 2.4 at 25°C (77°F) and 1013 hPa (Air=1.0)
Density	: 0.380 g/cm3 at 25 °C (77 °F)
Density	(as liquid) : 1.42 g/cm3 at -75 °C (-103 °F) (as liquid)
Specific gravity (Relative density)	: No applicable data available.
Water solubility	: 1.0 g/l at 25 °C (77 °F) at 1,013 hPa
Solubility(ies)	: No applicable data available.
Partition coefficient: n- octanol/water	: No applicable data available.
Auto-ignition temperature	: No applicable data available.
Ignition temperature	: no data available
Decomposition temperature	: No applicable data available.
Viscosity, kinematic	: No applicable data available.
Viscosity	: No applicable data available.
% Volatile	: 100 %
Oxidising Substance	: The product is not oxidizing.

### SECTION 10. STABILITY AND REACTIVITY

Reactivity	:	Decomposes on heating.
Chemical stability	:	Stable at normal temperatures and storage conditions.
Possibility of hazardous reactions	:	Polymerization will not occur.
Conditions to avoid	:	Avoid open flames and high temperatures.
Incompatible materials	:	Alkali metals Alkaline earth metals, Powdered metals, Powdered metal salts
Hazardous decomposition products	:	Decomposition products are hazardous., This material can be decomposed by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrofluoric acid and possibly carbonyl fluoride., These materials are toxic and irritating., Avoid contact with decomposition products

### SECTION 11. TOXICOLOGICAL INFORMATION

Trifluoromethane	
Inhalation 4 h LC50	: > 663000 ppm , Rat
Inhalation Low Observed Adverse Effect Concentration (LOAEC)	: > 500000 ppm , Dog Cardiac sensitization
Inhalation No Observed Adverse Effect Concentration	: 500000 ppm , Dog Cardiac sensitization
Repeated dose toxicity	: Inhalation Rat
	NOAEL: 28.634 mg/l No toxicologically significant effects were found.
Mutagenicity	: Animal testing did not show any mutagenic effects. Evidence suggests this substance does not cause genetic damage in animals.
Reproductive toxicity	: No toxicity to reproduction Evidence suggests the substance is not a reproductive toxin in animals.
	8 / 11

Version 2.0	
Revision Date 03/30/2015	Ref. 13000000131
Teratogenicity	: Animal testing showed no developmental toxicity.
Further information	: Cardiac sensitisation threshold limit : > 172414 mg/m3
to HazCom 2012, Appendix Program (NTP) Report on C	ations for this product and/or its ingredients have been determined according A.6. The classifications may differ from those listed in the National Toxicology arcinogens (latest edition) or those found to be a potential carcinogen in the search on Cancer (IARC) Monographs (latest edition).
None of the components pre by IARC, NTP, or OSHA, as	esent in this material at concentrations equal to or greater than 0.1% are listed a carcinogen.
SECTION 12. ECOLOGICAL INFORM	ΙΑΤΙΟΝ
Aquatic Toxicity Trifluoromethane 96 h LC50	: Pimephales promelas (fathead minnow) 633.26 mg/l
96 h EC50	: Algae 154.54 mg/l
48 h EC50	: Daphnia magna (Water flea) 323.05 mg/l
Environmental Fate	
Trifluoromethane Biodegradability	: Not readily biodegradable.
Bioaccumulation	: Bioconcentration factor (BCF) : 3.2 Bioaccumulation is unlikely.
Additional ecological information	: no data available
SECTION 13. DISPOSAL CONSIDER	ATIONS
Waste disposal methods - : Product	Can be used after re-conditioning. Recover by distillation or remove to a permitted waste disposal facility. Comply with applicable Federal, State/Provincial and Local Regulations.
