## W96V Communicating Two-Stage, Variable Speed, Multi-position Gas Furnaces

The innovative WeatherKing® W96V Gas Furnace is a smart option. We've thought of everything to bring you efficient and dependable indoor comfort solutions.

- **Enjoy greater comfort and performance** thanks to a two-stage operation that offers a more consistent indoor environment – keeping cold spots to a minimum. The two-stage heating design primarily operates on low-speed, only temporarily switching to high during peak cold-weather conditions.
- **Quiet and efficient comfort** is what you get with W96V Gas Furnace. The new patented heat exchanger design provides **improved airflow**, which reduces operating sound by 20%\*\* . The ECM motor also contributes to a quiet, more efficient operation. It's engineered to provide better humidity control while using less power. Overall, this is one of the **quietest furnaces on the market**. And because it's **high-efficiency**, your monthly energy bill will benefit, too.
- **Dependability** is of the utmost importance when it comes to your family's comfort. Our W96V Gas Furnace comes standard with the direct spark ignition system (DSI), which is one of the most dependable ignition systems available today. This proven technology is also used on ovens and stoves – appliances that you rely on daily to ignite.
- **Protect your home** with the industry's first blocked drain sensor, which will shut off your furnace when a drain is blocked, preventing water spillage and potential water damage to your home. All this and one of the best warranties in the industry translate to fewer repair bills and more cozy nights at home.
- **Easy installation and maintenance** features benefit consumers, too. This means savings on installation costs and maintenance. The W96V Gas Furnace is designed with the industry-first, 7-segment LED display that makes services calls quick and easy.

### Limited Warranty Information\*\*\*:

Heat Exchanger - Limited Lifetime

Conditional Parts (Registration Required) - Ten (10) Years

Conditional Unit Replacement: Ten (10) Years

**High Efficiency  
96% A.F.U.E.  
Upflow Models  
Input rates from  
60 to 100 kBTU**

\* Annual Fuel Utilization Efficiency (A.F.U.E.) measures the amount of heat delivered to a home compared to the amount of fuel that is supplied to the unit. Higher A.F.U.E. ratings reflect higher efficiency.

\*\* Testing showed, on average, a 20% reduction in sound when compared to previous WeatherKing® gas furnace models.

\*\*\* Registration within 60 days of installation, original homeowner and residential application only. See Warranty Card for full details.
