

Condensing Units

13AJN Condensing Unit

The WeatherKing Residential Condensing Unit Line features several innovations that improve dependability and efficiency.

- Wrap-around Cabinet**
 Constructed with a galvanized steel cabinet to protect the condensing coil fins from yard hazards, weather and corrosion.
- Fan Motor Mount and Grille**
 The motor mount/grille combination protects the fan motor from the elements and also reduces sound and vibration. The result: **increased durability**. The discharge pattern of the top grille provides minimum air restriction, resulting in quiet fan operation.
- Base Pan**
 The condensing unit uses a one-piece drawn and painted base pan. This pan elevates the coil off the pad helping minimize corrosion while reducing sound.
- Outdoor Coil**
 The condensing unit uses an innovative wrap-around outdoor coil which allows improved airflow transfer and reduces energy consumption.
- R-410A Refrigerant** **R-410A**
 This condensing unit features Industry Standard R-410A Refrigerant.

**Nominal Cooling Capacities
from 1½ to 5 tons**

**Efficiencies up to
14.5 SEER / 12 EER**

Limited Warranty Information

The 13AJN models have a ten-year conditional parts and compressor warranty (Registration Required). See the product warranty card for details.
