The Estimated Annual Energy Consumption of this model was not
available at the time the range was published.

Therms/year is a measure of energy use. Your utility company uses it to compute your bill. Only models with maximum flow rates above 3.0 gpm are used in this scale.

Natural gas water heaters that use fewer therms/year cost less to operate. This model's estimated yearly operating cost is:

\$126

Based on a 2000 U.S. Government national average cost of 68.84¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
