Based on standard U.S. Government tests

Water Heater – Natural Gas Rinnai Corporation Capacity (first hour rating): Model(s) V2532FFU 199 gallons/hour

Compare the Energy Use of this Water Heater with Others Before You Buy.

This Model Uses 187Therms/year

Energy use (Therms/year) range of all similar models

Uses Least Energy 187

Uses Most Energy

V2532FFU-C

The Estimated Annual Energy Consumption of this model was not available at the time the range was published.

Therms/year is a measure of energy use. Your utility company uses it to compute your bill. Only models with maximum flow rates above 3.0 gpm are used in this scale.

Natural gas water heaters that use fewer therms/year cost less to operate. This model's estimated yearly operating cost is:

\$128

Based on a 2000 U.S. Government national average cost of 68.84¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Based on standard U.S. Government tests

Water Heater – Propane Capacity (first hour rating): 213 gallons/hour Rinnai Corporation Model(s) V2532FFU-C

Compare the Energy Use of this Water Heater with Others Before You Buy.

This Model Uses 189gallons/year

Energy use (Gallons/year) range of all similar models

Uses Least Energy 197 Uses Most Energy 260

The Estimated Annual Energy Consumption of this model was not available at the time the range was published.

Gallons/year is a measure of energy use. Your utility company uses it to compute your bill. Only models with maximum flow rates above 3.0 gpm are used in this scale.

Propane water heaters that use fewer gallons/year cost less to operate. This model's estimated yearly operating cost is:

\$145

Based on a 2000 U.S. Government national average cost of 77¢ per gallon for propane. Your actual operating cost will vary depending on your local utility rates and your use of the product.
