

# THE ASHTON SERIES

Fireplaces Inserts

  
Lexington Forge®

## THE ASHTON SERIES *2*

Founded in fire and forged in history, Lexington Forge offers the tradition of fine craftsmanship and the convenience of contemporary technology in each of its uniquely beautiful stoves. Beyond its utilitarian uses for cooking and heating, fire has always been a gathering point at the hearth of every home. Create your

own gathering space and add the beauty and classic warmth of a Lexington Forge to yours. It will spark your own traditions and new reasons for coming together. After all, it's never too late to forge your own history.

WHERE OLD WORLD  
CRAFTSMANSHIP AND  
21<sup>ST</sup> CENTURY  
TECHNOLOGY MEET.

## DIRECT VENT INSERTS

The Ashton Insert Series, like all Lexington Forge appliances, is built to stand the test of time. We understand that durability and performance are important criteria when selecting an insert for your home. While we deliver these features on every product we produce, we also know that a fireplace is often the focal point of a room or home. An insert adds value, comfort and beauty to any setting. Our designers and craftsman have meticulously scrutinized every detail to ensure that you receive the finest fireplace insert built today.

### LEXFIRE BURN SYSTEM™

**Exclusive LexFire Burn System** – combines all of the elements of a natural wood fire to produce flames so realistic, you'll forget it's not real wood.

**Realistic Logs** – starting with hand carved samples that are perfectly proportioned to fit the insert size and viewing area and then color enhanced to match real wood.

**Yellow Flames** – bright yellow flames appear almost translucent in color.

**Log glow** – as log surfaces heat up they produce a bright reddish orange glow, similar to wood in the secondary stages of combustion.

**Ember Bed** – a large area of burning ember replicates the look of wood in the final stages of combustion.

**Primary Combustion Zone** – primary combustion of fuel load.

**LexFire Burner** – gas and oxygen are precisely metered and strategically distributed to provide optimum flame presentation.

## ASHTON DIRECT VENT FEATURES

- Flush face design
- Ceramic glass with large viewing area
  - 371 Square Inches (AI31DVC)
  - 475 Square Inches (AI42DV)
- Fireplace interior offers a beautiful, richly colored ceramic brick pattern
- Featuring the exclusive LexFire Burn System™ with a realistic detailed dual burner log set, a beautiful glow with five distinct flame areas and a large ember bed
