

SUMPRO[®]

PLATINUM

Overview

The Sumpro Platinum is the ultimate in innovative flood protection. The Platinum Series incorporates two 3/4 HP heavy-duty pumps, a fully automatic auxiliary power supply, a PumpGuard Plus™ duplex pump controller and high water alarm with an optional dialer that will call up to nine different numbers alerting you to a flood emergency.

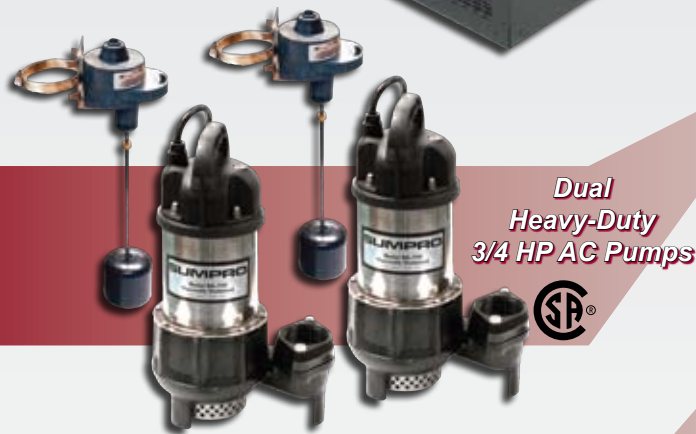

The Sumpro Platinum provides superior performance and twice the protection leaving your home dry and protected. The Platinum Series is ideal for larger homes with heavy water intake or for homeowners who want the peace of mind knowing they have the most reliable system on the market, protecting their home.

Patent #5,508,905

The Brains

Sumpro™ is a fully automatic auxiliary power source that takes DC battery power and converts it into 115 VAC power to run the pumps when standard power fails or is not available. The Sumpro™ uses a high efficiency charging system to manage and control the charging function. During a power emergency, the Sumpro™ will power your pumps with two maintenance-free batteries, keeping your pumps running and your basement dry between 15 and 20 hours on average. By adding extra batteries, you can double or triple the run time.

*Dual
Heavy-Duty
3/4 HP AC Pumps*

The Muscle

The Sumpro Platinum series incorporates two 3/4 HP pumps capable of pumping 84 gallons of water per minute each, at 10' of lift. The pump is ideal for use in heavy-duty sump and utility applications. Other features include an oil-cooled motor, an adjustable vertical switch and unique compact design.

The Eyes

The PumpGuard Plus™ is a state-of-the-art high water alarm and pump alternator. You will never worry about a bad pump again because the PumpGuard Plus alternates between the two pumps, each cycle, ensuring proper operation and wear. If a pump should fail, the PumpGuard Plus' override/alarm switch sounds the alarm, alerting you to the problem and then automatically activates the next pump in sequence, keeping your basement dry! Combine your PumpGuard Plus with an optional dialer for remote alert and never worry about flooding again!
