

IMPERIAL 700-A1

BASEBOARD RADIATION

SUNTEMP

IMPERIAL 700-A1

NEW

Optional
18 Gauge

Front
Panel

Beautiful? Obviously. But first and foremost, IMPERIAL 700-A1 has a heating job to do. And never before has baseboard radiation been so well equipped to do it! Tops in all categories. . . comfort . . . silence . . . convenience . . . strength . . . safety . . . cleanliness . . . styling . . . efficiency . . . economy. Not just by words, but by such solid facts. . .

COMBINED BACK PANEL AND TOP

Lends itself to either flush or recessed installation, with usual measuring and leveling eliminated.

DAMPER-LOUVER

Regulated at a touch from full open to closed. . . or to any point between. . . for true perimeter heat control. Painting after installation will not hamper its operation.

RETURN TUBE HANGER

The improved bracket design now provides an area to tuck a return tube inside, concealed from view. The return tube hanger locates in pre-punched slot and hole to accurately locate and support the tube.

SLIDING SUPPORT BRACKET

Permits easy installation of the bracket anywhere along the back panel. Provides radius pivot that holds damper-louver. Also supports heating element, front panel and return pipe line.

EXPANDED COPPER TUBE END

Need for couplings is eliminated by expansion of one end of tubing to receive small end of the next element.

BACK PANEL EXTENDED BOTTOM

Provides track for support bracket. . . for finished floor appearance. . . a bonus which

eliminates an area of dust accumulation and the need for special molding.

LOCKING FRONT PANEL

The enclosure front attaches to the support bracket by means of a positive latch. This prevents dislodging accidentally or by playful children. Now available in 18 gauge.

HEATING ELEMENT

With deep-drawn collars instead of holes, the channeled fins sheath the expanded copper tubing for strongest mechanical bond and maximum thermal contact. These deeply channeled fins with double bent boxed ends have 36% more heating surface and absorb the outward expansion of the tubing to prevent pinging noises.

EXPANSION CRADLE

Made of durable polypropylene, it isolates the heating element from contact with the front panel, back panel and support bracket. Its smooth gliding surface eliminates noises caused by lateral expansion of tubing. Small dimples engage into the small openings on the side of the element to help lock onto the fins.

HEAT CONTROL DAMPER-LOUVER

Can be operated, by a touch, from any point along its length. Deflects air through front outlet so walls can not get dirt-streaked. Painting, after installation, does not hamper its later operation. **Also, features a concealed return tube.**

HEATING ELEMENT WITH HEAVY-GAUGE CHANNELIZED FINS . . . AND DEEP-DRAWN FIN COLLARS

SUPER STRONG. . . Heavy channeled fins are most rigid. Deep-drawn collars bond strongest.

SUPER SILENT. . . Channels end "oil-can" ping noises. Cradles end lateral expansion noises.

SUPER SAFE. . . Double bent boxed ends prevent cut fingers for complete safety.

SUPER EFFICIENT. . . 36% more fin radiating surface. Maximum tube-to-fin heat transfer.

ENCLOSURE FITS ANY DECOR

It's low—7 $\frac{7}{8}$ " . . . and narrow—2 $\frac{1}{8}$ "
Satin-white baked finish. Front outlet prevents wall streaking. Easy to clean rounded-edge surfaces.

TAB-ON ACCESSORIES

Easy, speedy no-tool installation. Standard and hinged types available. All tab type accessories stay where they were put.

LB/R DENOTES APPROVED RATINGS

DIMENSIONS

IMPERIAL 700-A1-3/4" HEATING CAPACITIES											
WATER FLOW RATE LB./HR.	HOT WATER — BTU/HR./LIN. FT.

1/2"	.260	2.880

NOTE: DIMENSIONS IN "()" ARE SHOWN IN MILLIMETERS

Enclosure lengths	2' to 14'
Element lengths	3' to 8'

Note: Consult factory for palletized quantities.

NOTES:

All the ratings noted include a 15% addition for heating effect. These ratings are based on active length, which is total length less 4 3/4".

The use of ratings at 4 GPM (2000 lbs. per hour) is limited to installations where the water flow rate through the baseboard unit is equal to or greater than 4 GPM.

Where the water flow rate through the baseboard is not known, the rating of 1 GPM

(500 lbs. per hour) must be used. Suntemp Imperial heating elements are constructed of 3/4" and 1/2" nominal copper tubing, mechanically expanded within aluminum fins. Fin dimensions for IMPERIAL 700-A1-3/4" are 2" x 2 1/2" x .010; fins are spaced 51.1 fins per lineal foot. For 700-1/2", fin dimensions are 2 1/8" x 2 1/8" x .008; fins are spaced 52 fins per lineal foot. External finish of element: unpainted, tubing and fins.
