

Technical Service Bulletin #0905

Improved Front Display Available – 04/23/09

Grand Hall USA, Inc. 3838 West Miller Road Garland, Texas 75041 TEL 866 946 1096 FAX 972 279 8440 www.eternalwaterheater.com

Applicable Models:

All

Affected Serial #s:

All units starting G900289

Description:

A new version of the Front Display Controller is now available and offers two notable improvements over previous version:

1. The LED segments are now stronger and less susceptible to “blinking” out. This is also applicable in outdoor applications where we have received complaints about losing a digit or part of a number.
2. Circuitry contacts are now stronger and provide more consistent power signal to the unit. We have received reports of units randomly turning themselves off without apparent cause. After investigation, the previous Front Display Controllers can sometimes lose contact at the power button causing random shutdowns.

The improved Front Display Controller is backwards compatible with units equipped with previous version. The old controller is labeled S150RMUSACOM, and the new controller is labeled S150FMUSACOM.
