

# Green now and forever.

Eternal hybrid™ is an advanced water heating system with a self cleaning counter-flow design that prevents sedimentation build-up. The result is consistent performance and 86% efficiency, shower after shower after shower.

Consider the advanced Eternal hybrid for your next residential or commercial project.

Please contact us for more information.

### Eternal Hybrid™ Features:

- » Patented counter-flow technology maintains 86% efficiency
- » Near zero greenhouse gas emissions means Eternal is one of the cleanest burning appliances on the market
- » Delivers hot water faster than tankless units
- » Supplies endless hot water to multiple applications at once
- » Half the size of a 50-gallon tank water heater with 300% higher output
- » Built-in reservoir is designed for use with recirculation systems
- » Extremely low exhaust temperature allows Eternal to be PVC vented for easier more economical installs
- » Multi-stage safety features
- » Stainless steel reservoir is self-cleaning, maintenance free and backed with a 20-year no-leak warranty for residential, 10-year for commercial
