MINIMUM WIRE SIZE A	WG
MAXIMUM OVERCURRENT DEVICE FUSES/HACR BREAKER AM	MPS

The RGRM- 12 gas furnace has earned the ENERGY STAR® in all U.S. South States.

FEATURES FOR RGRM-

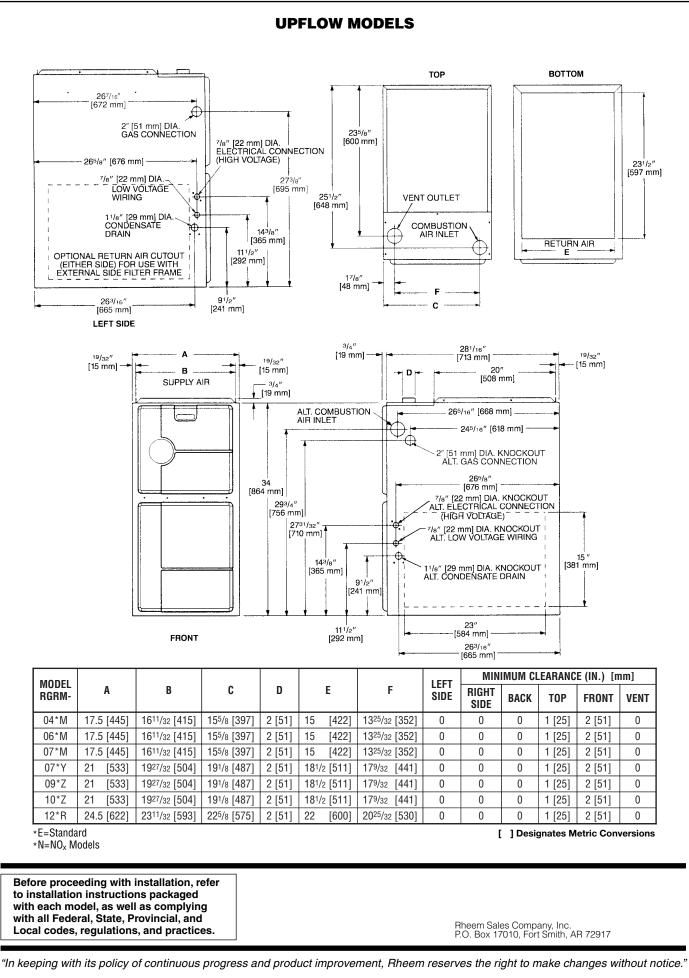

- Two stages of operation to save energy and maintain optimal comfort level.
- Furnace operates at 70% capacity for low-heat and 100% capacity for high-heat.
- Compatible with single or two-stage thermostat. (For optimal performance a two-stage thermostat is recommended.)
- Heat exchanger is constructed of all aluminized steel for maximum corrosion resistance and thermal fatigue reliability.
- Low profile "34 inch" design is lighter and easier to handle and leaves room for optional accessories.
- Left or right side gas, electric, and condensate drainage connections.
- Integrated control board manages all operational functions and provides hookups for humidifier and electronic air cleaner.
- An insulated blower compartment, a slow-opening gas valve and a specially designed inducer system make it one of the quietest furnaces on the market today.
- Variable speed blower motor technology provides ultimate humidity control, quieter sound levels and year-round energy savings.
- Optional indoor or outdoor combustion air. In addition, combustion air may be piped to either the top or side of the cabinet on all upflow models. A special molded fitting is provided to ease installation.
- Control fuse protection.
- Solid bottom is standard.
- Control board diagnostics.

+A.F.U.E. (Annual Fuel Utilization Efficiency) calculated in accordance with Department of Energy test procedures.

FIELD INSTALLED ACCESSORIES

Plenum Adapter (RXAA-)	
Vent Termination Kits Concentric:	
Vertical/Horizontal: RXGY-E03A	
Horizontal Two Pipe: RXGY-D02, RXGY-D03, BXGY-D04	
Condensate Pump Kit: RXGY-B01	
Neutralizer Kit: RXGY-A01	
Fossil Fuel Kit: RXPF-F01 and F02	
Return Air Plenum (RXGR-C17B, 21B, 24B)	
External Bottom Filter Rack: RXGF-CB	
External Side Filter Rack: RXGF-CA (Side) RXGF-CB (Bottom)	
High Altitude Kit: (RXGY-F18, F20, F21)	

"Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your Contractor for details or visit www.energystar.gov."
