Energy Star Compliant

For energy conservation and clean air, choose a Ruud high-efficiency furnace. You could save between 15% and 40% on your utility bills (depending on the age of your existing equipment), and help the environment in the process.

Utility companies may offer rebates when you purchase high-efficiency heating and cooling equipment. Call your local utility company for more information.

Outstanding Limited Warranty

Ruud supports its furnace equipment with strong limited warranties and reliable, professional service. All parts are covered by a five year limited parts warranty.

In addition to the Five Year Limited Parts Warranty, a conditional Limited Lifetime Replacement Warranty applies to UGFD, UGDD and UGJD models for Ruud to provide a replacement UGFD, UGDD or UGJD Gas Furnace to the original purchaser if the heat exchanger fails during the lifetime of the unit. See our *Ultra Series* Limited Warranty Card for more details.

Protection You Can Count On

While your Ruud equipment is incredibly dependable and covered by an outstanding warranty, you can extend your warranty coverage with Protection Plus[®] extended service protection. Then you can relax and enjoy the comfort of your Ruud Furnace – without worrying about the cost of parts or labor for unexpected repairs. Ask your dealer about the variety of Protection Plus plans now available. For more information, call 1-877-276-4294 or visit www.protectionpluseonline.com.

KwikComfort[®] Financing

Ask your Ruud dealer about KwikComfort[®] Financing, the easy and convenient way to finance everything associated with your Ruud equipment – your original equipment, all subsequent service, Protection Plus[®] extended service protection, and even the comfort options you might choose to add later.

 The world outside will keep spinning,
 but your world, you control.
 You can rely on life to hand you something exciting
 and new every day.
 Rely on Ruud Ultra® Series to keep the comfort coming home.

The Furnace for Everyone and Every Part of the Home

- At the thermostat, air temperature can be maintained within one-half degree of the desired setting. Everyone is comfortable.
- The very low-speed continuous fan mode minimizes hot or cold spots, maintaining a uniform temperature while it constantly filters the air to help you keep your home cleaner.
- With the touch of a button on the Ruud *Contour Comfort Control* Thermostat, you can program the desired temperature settings to meet your changing heating requirements throughout the day, and even check the outside air temperature.
- A remote sensor communicates the temperature in any part of the home to the thermostat and the furnace.
- The compact size of the furnace allows greater installation flexibility and supports the easy addition of an electronic air cleaner and humidifier.
- Your family will save money on energy bills because this patented Ruud technology provides energy efficiency, which adds up to a lifetime of savings.

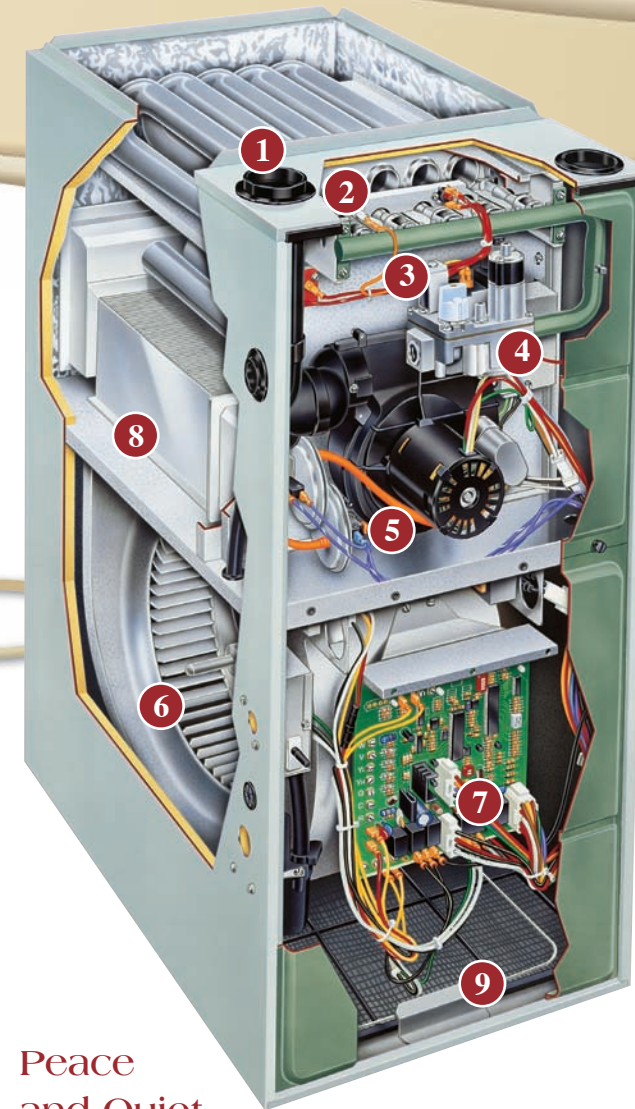

The Ruud Modulating Gas Furnace Thermostat

One reason for the remarkable performance of the Ruud *Ultra Series* Modulating Gas Furnace is the unique touchscreen thermostat. This truly intelligent thermostat analyzes the heat loss of your home and directs the furnace to give you the precise temperature at the precise time you desire it. The fresh appearance, and large, lighted touchscreen display allows convenient and instant viewing. The thermostat features easy menu-driven programming that allows you to set weekly temperatures – then the option to adjust them for the weekend, when your temperature preferences typically change. The Modulating Gas Furnace Thermostat also has integrated dual fuel capabilities, which means the need for external fossil fuel kits is no longer an issue. The benefits of

the *Contour Comfort Control System* can be fully utilized when used in conjunction with the Modulating Gas Furnace Thermostat.

Model UHC-TST401MDMS

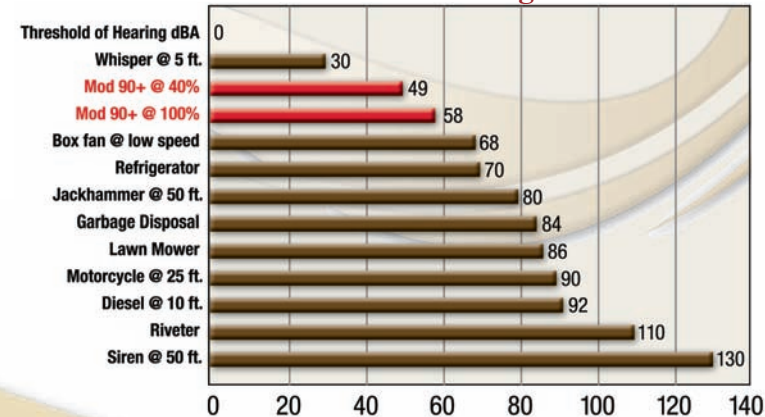

Peace and Quiet . . .

A vital part of your comfort is peace and quiet. And this is where the quiet operation of the Ruud *Ultra Series* 90 Plus Modulating Gas Furnace pays real dividends.

The Ruud *Ultra Series* 90 Plus Modulating Gas Furnace operates at just above a whisper, far more quietly than a conventional furnace.

Sound Comparisons with the Ruud Ultra Series Modulating Gas Furnace

How It's Different and Why It's Better.

While the Ruud *Ultra Series* 90 Plus Modulating Gas Furnace is a highly sophisticated heating product, the concept behind it is quite simple.

A conventional furnace is either “off” or “on” at 100% capacity depending on the demand for heat. Thus, the temperature in your home goes up and down, varying as much as five degrees, while the furnace cycles.

The Ruud *Ultra Series* 90 Plus Modulating Gas Furnace is seldom “off” and seldom “on” at 100%. Your Ruud *Ultra Series* 90 Plus Modulating Gas Furnace is so quiet, you may never know it's on. And it's so frugal with both gas and electricity, that it has perhaps the highest overall efficiency* of any furnace.

Furnace Features

1. Primary Stainless Steel Heat Exchanger
2. Direct Spark Ignition & Remote Flame Sensor
3. Modulating Gas Valve
4. Burner
5. Two-Speed Induced Draft Blower
6. Modulating ECM2+ Blower Motor
7. Integrated Furnace Control
8. Secondary Heat Exchanger
9. Easy-Access Washable Filter

*This furnace has a superb A.F.U.E. rating of 92% or greater. However, A.F.U.E. considers only gas and not electricity consumption. The electrical savings of this furnace are substantial when compared to a conventional 90 plus furnace design. Ask your dealer for an estimate of savings in your area.
