- How the Comfort System Works

THE GRUNDFOS **COMFORT SYSTEM**

- 1 pump: The Comfort System is installed on your hot water heater to help pull "recycled" water back to the hot water heater to be reheated and recirculated.
- **2** pipes: Hot water is always at hand because it circulates from the hot water line to the cold water line and back to the hot water heater.
- 3 valve: Placed under the sink farthest from the hot water heater, the valve helps regulate the flow from the hot water line to the cold water line.

Electrical Connection: The pump is fitted with a 10 foot cord and 115V plug.

Timer: 3 control options available:

- Continuous
- 15-minute intervals
- OFF

Performance Curve:

Pump Technical Data:

Flow Range: 0 to 6.5 U.S. GPM **Head Range:** 0 to 6.0 U.S. Feet Single Phase, 115V Motor: Min. Fluid Temperature: 36°F (2°C)

Max. Fluid Temperature: 150°F (66°C) Max. Working Pressure: 145 PSI

Electrical Data:

Volts: 1X115V Watts: 25W Amps: 0.23A
