

DOING WHATEVER IT TAKES, WHENEVER AND WHEREVER THE INSPIRATION STRIKES.

AMERICAN INGENUITY AT WORK.™

Sometimes it's subtle. Other times, it couldn't be more obvious. But either way, it's going on here every minute of every day. American ingenuity at work. That's because no matter how good our kitchen and bath products get, our nature is to make them even better.

Through observations, insights and input, we're constantly improving things in resourceful and surprising ways. Next thing you know, life becomes just a little better. Easier. More relaxing. And ultimately, that's what makes all of our hard work worthwhile.

Town Square® Full palette of mistake-proof design options—unmistakably American Standard.

Cascada Furniture Collection (32" Vanity with Newbern™ Vanity Top, Mirror with Drop-Down Shelf, Vanity Stool, Waste Basket and Floating Shelves); Cadet® 3 Toilet, Hampton™ Minispread Faucet and Evolution™ Whirlpool.

**Cascada** Timeless design allows your personal sense of style and comfort to evolve.

DRIED SPOTS WIPE OFF SO EASILY,  
THE CHILD WHO PUT THEM THERE COULD DO IT.

SHINING EXAMPLES OF INGENUITY AT WORK.

When you find the perfect faucet for your bathroom, you want it to always look as good—and work as well—as the day you bought it. That's why we're always making our faucets better, despite how good they may already be.

EverClean™ Finish Faucets  are so easy to keep clean, a single wipe gives you a perfect shine without cleaning products. Fastidious? Boy, have we got a faucet for you.

Speed Connect™ Drains  have one-third the parts of a typical drain and install in one-third the time. There are only 4 parts to assemble, versus the typical 14. Plus, they're engineered for a watertight seal every time.

What's more, all American Standard bathroom faucets feature drip-free ceramic valves and lifetime warranties  on function and finish. If you're shopping for a new faucet, you've come to the right place.

**EVERCLEAN™ FINISH FAUCETS**

This innovative finish is unlike any other and actually enables bathroom faucets to look and stay cleaner in between cleanings.

Presenting the only faucets that are spot-free in one wipe.

A permanent protective finish helps keep the faucet looking like new.

**Easy to keep clean**—a single wipe gives you a perfect shine without cleaning products

**Patented, permanent finish** will last for the life of the faucet

**Offered in** a broad range of single- and two-handle bathroom faucet styles and finishes

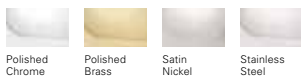

**Dried-on water spots and soap scum come off easily with a dry cloth. No more scrubbing.**

Dried water spots

Patented EverClean finish technology prevents dirt and grime from adhering to the faucet's surface.

**Current EverClean Finish Selections**

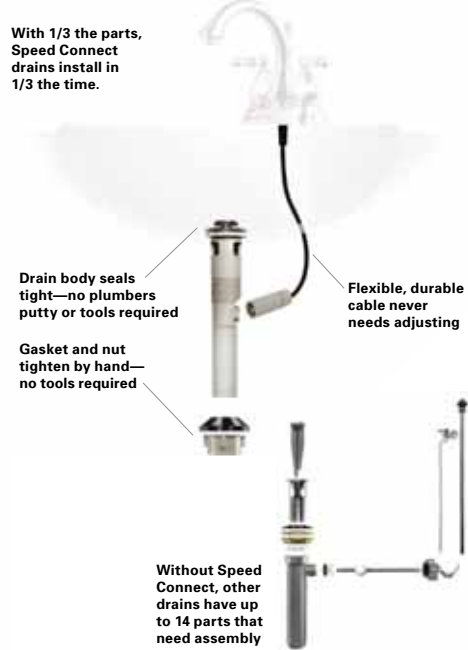

Polished Chrome Polished Brass Satin Nickel Stainless Steel

**SPEED CONNECT™ DRAINS**

This ingenious drain design is an American Standard exclusive.

With 1/3 the parts, Speed Connect drains install in 1/3 the time.

The fastest faucets to install feature our new Speed Connect drains.

**Has one-third the parts than** major competitors and installs in one-third time

**Drain seals tightly** every time and never needs adjusting

**Does not require tools**, caulk, tape or putty

**Offered on a broad range** of styles and finishes

Streamlined Speed Connect assembly

Speed Connect makes installing a drain simple

Other drain assembly

Pop-up rod never needs adjusting

**:: Cast Brass Construction**

In order to produce faucets that are literally tougher than nails, we use cast brass construction. Our state-of-the-art manufacturing process allows us to consistently produce seamless, easy-to-clean faucets of the highest quality.

**:: Ceramic Disc Valves**

Unlike rubber washers that wear out and deteriorate, our ceramic disc valves simply won't wear out. The air-tight, water-tight seal that they form is guaranteed for life. So your faucet will never, ever drip.

**:: Limited Lifetime Warranty**

All American Standard products come with a minimum one year warranty. We also back many of our products with our extended warranties. All American Standard faucets feature a Lifetime warranty on function and finish. What's more, many of our faucets are made with Physical Vapor Deposition (PVD) technology for a perfect finish that resists tarnishing, scratching and corrosion for the life of your faucet.

**:: Thermostatic Valves**

Thermostatic valves are like cruise control for your shower. Simply pre-set your preferred temperature and these valves will precisely maintain it, even when there are pressure or temperature fluctuations in the water supply. They also provide more water flow than other valves, and are ideal for multiple-spray shower systems.

**:: Pressure Balance Valves**

Showers featuring precision-engineered valves can maintain a constant temperature even when the water pressure changes thanks to somebody flushing the toilet, doing the laundry or watering the lawn. Helps prevent scalding as well as chilly, rude awakenings.

**:: Hot Limit Safety Stop**

This exclusive safety feature, found on many American Standard single-handle bath, sink and shower faucets, prevents scalding by restricting your faucet's hot water output. Once properly adjusted, accidental scalding is prevented because the handle cannot be turned all the way to the hot position. It's an important feature to have, especially if your household includes children and seniors.

**:: TRIMendous Options**

When it comes to faucets, the term "trim" refers to all the visible parts of your bath and shower, including the showerhead, shower arm/flange, handles, wall plate, diverter and tub spout. Not long ago, if you wanted to replace any of these parts with new trim, you'd have to rip out chunks of wall to do so. Thanks to our TRIMendous

line of interchangeable bath/shower and deck-mount tub filler trim kits, those days are over. The TRIMendous common-valve system allows your one-valve to accommodate a variety of stylish trim kits. Now you can update the look of your bathroom without the help of a plumber. In fact, all you'll need is a screwdriver.

**:: Single Hole Installation**

One hand can control both water temperature and volume with modern single-handle/single-hole faucets. Or choose a distinctive dual-handle/single-hole design.

**3 Holes – 4" Centerset and Minispread**

If your sink or counter has 3 holes with a 4" spread, you have the following options: a dual-handle 4" mini-spread, a single-handle 4" centerset, a dual-handle 4" centerset, or a single-handle/single-hole faucet with a deck plate.

**3 Holes – 8" Widespread**

Extra space makes dual-handle 8" spread faucets easy to clean. Plus, they look great on larger sinks, and often come with multiple handle designs so you can easily update your look.

SINKS THAT MAKE IT EASY TO WIPE OFF  
WHAT OTHERS LEAVE BEHIND.

WHEN INGENUITY WORKS, YOU TAKE IT EASY.

Because bathroom sinks have to face a daily onslaught of hot and cold water, make-up, soaps, lotions, hairsprays, gels, mud masks, shaving cream, toothpaste, et cetera, we engineer ours to be as durable as they are attractive.

Our newest sink innovation is Scotchgard® Surface Protection  which lets you clean your sink in a snap. Select American Standard sinks have Scotchgard built right in, so you can wipe away toothpaste, makeup, soap and lotions with ease, and without harsh and abrasive cleansers.

Since everybody's lifestyle—and sense of style—is different, we offer sinks in above-counter, wall-mount, pedestal, Right Height™  pedestal, countertop and undercounter models. Inside, there's sure to be a sink just right for you.

1 Morning™ Above-Counter

2 Petal\* Above-Counter

3 Mezzo Semi-Countertop

Big isn't always better. For bathrooms with a little less traffic, or for the beauty of minimalism, why use more than what you need? Our Morning and Loft™ Above-Counter sinks, and Mezzo Semi-Countertop sink are the perfect fit when space is limited. Each is elegantly designed for ease and comfort in any small bath or half-bath, and can be paired with a number of furniture choices.

YOUR 3-YEAR OLD'S AIM IS HIT AND MISS.  
YOUR TOILET IS SANITARY ANYWAY.

THIS IS AMERICAN INGENUITY AT WORK.

Whether you have a full nest or an empty one, you need toilets that can keep up with the demands of your household. Since flushing requirements differ from home to home, and even from bathroom to bathroom, we offer you four distinct flushing systems to choose from.

#### Champion® Flushing System

Our top-of-the-line system is virtually clog-free, so you'll never have to plunge again.  It's packed with innovative features that make it ideal for busy and/or large households.

#### FloWise™ Flushing System

This system delivers a forceful, yet frugal flush that uses 20% less water,  making it ideal for people who want to conserve water—and save money—with every flush.

#### Flush Right™ Flushing System

This system features a smarter design for higher performance and fewer clogs. What's more, its easy-to-clean design makes it ideal for medium- to high-use bathrooms.

#### AquaForce™ Flushing System

This system offers reliable performance that's well-suited for light- to medium-use bathrooms.

More reasons to choose an American Standard toilet include our ergonomically designed Right Height™  options and Speed Connect™ systems  that install in one-third the time. Whatever your specific toilet needs are, we've got you covered.

**THE CHAMPION® FLUSHING SYSTEM** 

Our top-of-the-line system is virtually clog free, so you'll never have to plunge again. It's packed with innovative features that make it ideal for busy and/or large households. **Flushes up to 200 feet of toilet paper.**

- A FLUSH TOWER™** This patented innovation provides the most powerful flush possible while using precisely 1.6 gallons of water. There's no chain and flapper, so there's no more jiggling the handle.
- B SILICONE SEAL** Silicone is one of the most chemical-resistant materials available.
- C 3½" OR 3" FLUSH VALVE** A high-flow 3½" (Champion One-Piece toilets) or 3" (Champion Two-Piece toilets) flush valve allows more water to enter the bowl faster for a more powerful flush. It keeps the bowl clean and eliminates streaking.
- D EXTRA-WIDE 2¼" SIPHON OUTLET** The industry's largest, fully glazed siphon outlet with no choke points ensures you only have to flush once.
- E LARGE WATER SPOT** Larger surface area results in a cleaner bowl.
- F SEAMLESS SWEEPING DECK** Thoughtfully designed to be as easy to clean as a one-piece toilet.
- G FLUIDMASTER® 400A WATER CONTROL** As one of the industry's most dependable water controls, the Fluidmaster 400A will provide years of flawless performance.
- H EVERCLEAN™ ANTI-MICROBIAL GLAZE** Permanent silver-based EverClean Anti-microbial Glaze helps the toilet keep itself clean by continuously inhibiting the growth of stain- and odor-causing bacteria, mold and mildew. Available summer 2006.
- I BEST BOWL WASH** Powerful water jet is perfectly positioned to remove everything in the bowl, all in one flush.
- J UNDER RIM CHANNEL** Directs a measured amount of water to sweep in under the rim for the cleanest, most powerful flush. Available on Champion two-piece toilets.

**THE FLOWISE™ FLUSHING SYSTEM** 

This system delivers a forceful, yet frugal flush that uses 20% less water, making it ideal for people who want to conserve water—and save money—with every flush. **Flushes up to 150 feet of toilet paper.**

- A FLUSH TOWER** The patented Flush Tower from the Champion Flushing System provides the most powerful flush possible while using precisely 1.28 gallons of water. There's no chain and flapper, so there's no more jiggling the handle.
- B SILICONE SEAL** Silicone is one of the most chemical-resistant materials.
- C 3" FLUSH VALVE** A high-flow 3" flush valve allows maximum water flow, releasing the full 1.28 gallons in under one second.
- D 2¼" SIPHON OUTLET** With a larger diameter than the industry standard, this fully glazed siphon outlet with no choke points helps prevent clogging.
- E EASY CLEAN™ SANITARY DAM** Prevents liquids from collecting under the tank, making it as easy to clean as a one-piece toilet.
- F FLUIDMASTER 400A WATER CONTROL** As one of the industry's most dependable water controls, the Fluidmaster 400A will provide years of flawless performance.
  - Ecologically sound—Will save a family of four up to 4,000 gallons of water per year and is perfect for LEED® submittal
  - Economically sound—Lower water bills
  - Ideal for homes with septic tanks and well water

**THE FLUSH RIGHT™ FLUSHING SYSTEM**

This system features a smarter design for higher performance and fewer clogs. What's more, its easy-to-clean design makes it ideal for medium- to high-use bathrooms. **Flushes up to 150 feet of toilet paper.**

- A 3" FLAPPER** Larger, chemical-resistant flapper allows more water to enter the bowl faster for a cleaner flush.
- B 2¼" SIPHON OUTLET** With a larger diameter than the industry standard, this fully glazed siphon outlet with no choke points helps prevent clogging.
- C EVERCLEAN ANTI-MICROBIAL GLAZE** Permanent silver-based EverClean Anti-microbial Glaze keeps toilet surfaces cleaner by continuously inhibiting the growth of stain- and odor-causing bacteria, mold and mildew.
- D PERFECT FLAT TANK** Unique tank design provides greater storage and stability.
- E SPEED CONNECT™ SYSTEM** Components are designed to install in 30% less time.
- F SLOPED BOWL BACKSPASH** Thoughtfully designed to be as easy to clean as a one-piece toilet, while providing greater tank-to-bowl stability.
- G FEWER DUST-CATCHING CREVICES** Exterior is easier to clean and keep clean.
- H LARGE WATER SPOT** Larger surface area results in a cleaner bowl.

**THE AQUAFORCE™ FLUSHING SYSTEM**

This system offers reliable performance that's well-suited for light- to medium-use bathrooms.

- A 2" FLUSH VALVE** A large flush valve provides the proper flow to create the most efficient swirl and jet function without creating a splash.
- B 2" EZ-FLOW™ TRAPWAY** A large 2" trapway creates a siphon action that pulls waste from the bowl, and the fully glazed interior provides a smooth, low-friction surface that reduces clogging.
- C LARGE WATER SPOT** Models feature a 10" x 9" or larger water surface, which results in a cleaner bowl.
- D SPEED CONNECT SYSTEM** Components are designed to install in 30% less time.
- E SANITARY DAM** Prevents liquids from collecting between the tank and bowl, thereby reducing odors and ensuring more sanitary conditions.

**ANTI-MICROBIAL SURFACES**

Not only are these innovative toilets more sanitary, they also stay cleaner by continuously repelling stains, dirt and grime.

Our permanent, silver-based EverClean™ Anti-microbial Glaze keeps toilet surfaces significantly cleaner inside and out

**Easy to Clean Features**

To make cleaning easier, our Heritage® and Savona® 1-piece toilets have smooth-sided trapways. And our Champion® two-piece toilets have a sweeping deck, while other two-piece models have an EasyClean™ Sanitary Dam or sloped bowl backplash that prevents liquid, dirt and grime from collecting between tank and bowl.

**EVERCLEAN ANTI-MICROBIAL GLAZE**

Champion and Flush Right toilets are available with a permanent silver-based double-coat anti-microbial glaze that keeps toilet surfaces cleaner by continuously inhibiting the growth of stain- and odor-causing bacteria, mold and mildew. And because the EverClean glaze is fired in during the manufacturing process, it won't wash off or wear away. American Standard's anti-microbial glaze will provide reliable antibacterial protection for the lifetime of the toilet. Surfaces repel dirt and grime, keeping toilet surfaces cleaner by reducing adhesion of mineral deposits. The super-smooth glaze results in a mirror-like surface that's easier to keep clean, even after years of use.

Available on Champion summer 2006.

**EVERCLEAN ANTI-MICROBIAL TOILET SEAT**

Our new EverClean silver-based anti-microbial toilet seats repel dirt and grime by continuously inhibiting the growth of stain and odor causing bacteria, mold and mildew, thus keeping your toilet seat surfaces cleaner. The anti-microbial additive is processed into the seat material and will not wear off over time.

These new seats are offered in standard Elongated (model 5284.016) and Round Front (model 5282.011) configurations. EverClean anti-microbial toilet seats are available in white, bone, silver, linen and black.

Toilets that help keep themselves clean are no longer just wishful thinking. Because now, toilets featuring the Champion® and Flush Right™ flushing systems are protected with our exclusive EverClean™ Anti-microbial Glaze.

**Reduces bacteria odors** and stains inside the bowl

**Unique double-coat glaze** is smooth, easy to clean and won't rub off

**Continuously inhibits** the growth of stain- and odor-causing bacteria, mold and mildew

SOMETIMES AN INGENUOUS IDEA WILL TAP YOU  
ON THE SHOULDER. (OR POKE YOU IN THE BACK.)

RELAX. IT'S AMERICAN INGENUITY.

That's exactly how we came up with the idea for Comfort Jets.™  Flat, smooth jets that sit flush against the side of the whirlpool making them much more comfortable to lean against.

That's ingenuity. It's how we make great ideas even better. We also have an incredible life-time warranty—which includes free in-home warranty repairs.

So relax. Enjoy. That's American ingenuity at work.

**:: Safety Feature**

Because just about every bathroom surface is slippery when wet, we put a great deal of effort into preventing slips and falls. From the StanSure™ anti-slip surfaces in our Americast™ bathtubs to the integral grab bars in our whirlpools, we're always coming up with more ways to help keep your family safe.

**:: Lifetime Drains**

Our new Lifetime drains\* are available in white, linen, satin and polished brass and allow you to fill the tub higher for a deeper, more relaxing soak.

\*Available only on Lifetime and Evolution models.

**:: Deeper Tubs**

American Standard whirlpools are designed to be deeper than most other manufacturers' models for one compelling reason: greater water capacity. Which explains their superior capacity for relaxation.

**:: Quiet Motors**

Since whirlpools should promote serenity, ours are equipped to do just that. What's more, American Standard's silent air controls draw air from beneath the tub deck, which eliminates the annoying "hiss" generated by typical whirlpools.

**:: Durability**

Americast bathtubs are our pride and joy. Tough as cast iron, but only half the weight. And our acrylic bathtubs aren't just reinforced with fiberglass, they're chemically bonded with fiberglass at the molecular level for superior strength.

**:: Safe-T-Heater**

Enjoy longer, more relaxing soaks by adding a heater. Most of our whirlpools allow for easy installation of a E-Z Install Heater, an enjoyable, yet affordable, option.

**:: Limited Lifetime™ Warranty**

All of our whirlpools and bathtubs, including our Lifetime/Evolution whirlpools, feature the industry's only Limited Lifetime™ Warranty,\* so you can spend time relaxing. American Standard's proven track record is supported by our National Warranty Program and National Service Agent Network.

\*Does not include the Colony® line of tubs and whirlpools

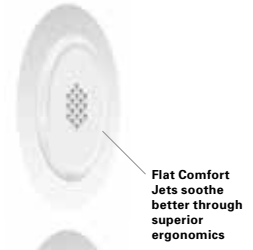

**EVOLUTION™ WHIRLPOOLS\* WITH COMFORT JETS™**

More smooth or more soothe. You decide. Our home whirlpools can be customized to fit your preferences. Choose the body contoured, flat-mounted jets of Comfort Jet or the relaxing, soothing bubbles of Air Spa™ Jet. Two great ways to indulge.

**COMFORT JETS**

Our new Comfort Jets look different because they are anything but typical. For starters, they're completely flush to the surface of the tub, and won't poke you in the back or anywhere else. They're also set at angles to circulate more water throughout the tub, so that your entire body—and not just the parts that are directly in front of the jets—receives a soothing hydromassage.

- Flat, closed surfaces are neater in appearance and easier to clean than other jets
- From a gentle, relaxing swirl to a more vigorous deep-tissue massage, you can select the intensity that's right for you
- Water currents extend farther and deeper into the tub for a more powerful—but never painful—hydromassage
- Strategically positioned for every body type—no adjustments are necessary

Flat Comfort Jets soothe better through superior ergonomics

Ordinary whirlpool jets can't help but protrude, poke and provoke

**AIR SPA JETS**

Designed to excite the skin and massage the body, our new Evolution Air Spa Jets generate millions of flowing, warm air bubbles to create a unique form of gentler hydrotherapy. Best of all, this exclusive, patented American Standard technology can be yours for a fraction of the cost of other effervescent tubs.

- Offers a gentler, more peaceful massage than traditional whirlpool jets
- Millions of champagne-like bubbles cascade all around your body
- Effervescent experience soothes, restores and rejuvenates

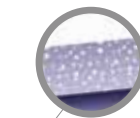

**EVERCLEAN™**

With the EverClean Anti-microbial System, you can spend more time enjoying your whirlpool and less time cleaning it. Presenting another American Standard exclusive. EverClean with anti-microbial AlphaSan® is a patented anti-microbial agent that's manufactured directly into the whirlpool's parts and plumbing. It's not just an exterior coating that will wear off in time.

Continuously inhibits the growth of stain- and odor-causing bacteria, mold and mildew.

AlphaSan® is a registered trademark of Milliken & Company.

Our EverClean option, featuring angled self-draining piping and anti-microbial parts and plumbing, helps keep your whirlpool cleaner between uses

Bone 021	Rhapsody Blue 209
Silver 165	Loganberry 210
Shell 173	Black 178

A APRON PANELS

For a finished look, style-matched removable apron panels are available for many of our whirlpool models. Whether you need an apron or not depends on the specific type of installation you have planned.

B EZ-INSTALL™ HEATER

This maintains your water temperature, so you can enjoy longer, more relaxing soaks. All Evolution whirlpools and Air Spa™ Baths are pre-plumbed at the factory to accommodate the optional EZ-Install Heater, and do-it-yourself installation requires only two steps.

C TILE BEAD KIT

The optional Tile Bead Kit provides a watertight seal between the deck of the whirlpool and the walls.

D LIFETIME DRAINS

Our new Lifetime drains are available in white, linen and polished brass and allow you to fill the tub higher for a deeper, more relaxing soak.

**Town Square®** Accommodates two bathers and infinite design possibilities comfortably.

**1 Town Square**  
5' x 42\"/>

**2 Town Square**  
6' x 42\"/>

The Town Square whirlpool collection. You can never have too much of a good thing. Large and luxurious, they have enough room, style and features to fill a bathtub wish list twice over. Choose from Hydro Massage or Therapeutic Air Massage Systems. Or keep it pure and simple with tub only.

**Integral Apron Models**

Thanks to their remarkable ease of installation, our acrylic integral apron whirlpools are always popular among builders and remodelers.

- :: One-piece design is ideal for a three-wall recessed installation
- :: Extremely durable, yet much lighter than traditional cast iron
- :: A cleaner appearance due to fewer seams, joints and crevices
- :: Integral three-sided tile/water retention flange ensures a quick and easy watertight installation
- :: Removable panel allows convenient access to the pump and motor

**Americast®**

Americast is our proprietary recipe for luxurious bathtubs, whirlpools and sinks. It's a revolutionary alternative to cast iron that's more durable, 50% lighter and costs less to install. And thanks to inherent manufacturing advantages, Americast bathtubs can be made deeper, flatter and roomier than their cast iron counterparts.

Additional benefits include:

- :: Faster, easier installations (even by one person)
- :: Integral, three-sided tile flange ensures a watertight seal on integral apron models
- :: Retains heat in the tub better and longer than cast iron
- :: Insulates noise better than cast iron
- :: StanSure™ slip-resistant surface for added safety

**Princeton® Bathtub Options**

Thanks to their remarkable ease of installation, our Americast integral apron bathtubs are always popular among builders and remodelers.

- :: A luxury ledge option, an industry first—four extra inches of storage space
- :: An attractive high-gloss, porcelain enamel finish that's easy to clean
- :: Ergonomic lumbar support and beveled headrest
- :: An optional Integral Overflow allows faster, easier one-point assembly (another American Standard exclusive)

THE BEAUTY IS EASY TO SEE.  
THE BRILLIANCE IS A LITTLE LESS OBVIOUS.

AMERICAN INGENUITY. BUILT IN.

Quite often the biggest ideas start out being the smallest. Just look at our insightful concealed storage features for example. They allow our furniture to accentuate your decor while easily accommodating the little things that tend to clutter up your bathroom.

And where wire drawer systems and modular plastic bins provide storage, they leave little room for style. Which is why we put such a high emphasis on high design, as demonstrated in our complete line of Cascada bathroom furniture.

Bathroom storage is rarely this beautiful. Or functional. Why not discover for yourself? This is American ingenuity at work.

**Right Height**  
 Taller designs reduce back and leg strain.

**Storage**

We've incorporated some ingenious storage solutions into our furniture designs, including a bowed shelf behind bowed cabinet doors, hidden fold-down doors, adjustable-height shelving and bottom drawers that actually work. Why? Because none of us are nearly as low-maintenance as we'd like to think. Example shown is the Brook Console in Parchment finish.

1 **Brook** Console Table\* in Espresso with Optional Granite Top and Ovalyn Lavatory

2 **Brook** Console Table\* in Parchment with Optional Alabaster White Marble Top and Ovalyn Lavatory

3 **Brook** Console Table Top with Solid Wood Top and Morning Lavatory

4 **Brook** Oval Mirror\*
