

Hallmark

Keeping families warm for over 60 years

BOYERTOWN FURNACE COMPANY

Thank you...

for considering the Hallmark Furnace. Since it first went into production in 1939, the Hallmark Furnace has delivered the finest quality and engineering innovations available in a warm air furnace. Our commitment to customer service and satisfaction at all levels is well known in the industry. By "listening" to our customers, we have been able to make engineering improvements

based on the direct input of the professionals who sell, install, and service warm air furnaces. Our engineers are constantly developing and incorporating the latest advancements to assure that the Hallmark Furnace meets current oil heating standards. Your oil dealer will tell you that the Hallmark is one of the most serviceable units available.

As a homeowner, you trust your oil dealer to provide heating equipment to keep your family warm on the coldest winter nights and your oil dealer trusts the Hallmark to deliver the comfort, performance, and reliability that his customers deserve.

Choice

Kiln-fired ceramic combustion chamber

Quality Insured

Like most companies, we put our guarantee in writing. But we take it a step further and instill the same standards in the minds and hearts of our employees. Each person is empowered to stop production if they see something which does not meet our standards of excellence.

A plant-wide "Quality Assurance Program" defines the standards against which every part and assembly is measured. Each heat exchanger is 100% mechanically tested, utilizing advanced technology to safeguard against defects.

Every furnace is inspected at final assembly and rechecked against stringent criteria before shipping. Our one goal is for you to receive your Hallmark with "Quality Insured."

Serviceability

Oil dealers love our definition of "serviceability." A generous 11" x 17" opening gets you right to the heart of our heat exchanger. Combine that with access through either our front or rear flue, and there is not one square inch of this heat exchanger that cannot

be routinely cleaned and maintained.

Externally mounted controls and burner allow technicians full access to easily adjust and set our equipment properly.

Low Boy, High Boy, and Counterflow models available with Beckett, Riello, and Carlin burners. Horizontal furnaces available with Beckett Burners only.

Two flues means you always have the right furnace! With front and rear flue outlets, the Hallmark fits **any** installation.

Plus

- **Limited Lifetime Warranty**
- Every Hallmark Furnace is packed in exclusive wood crating for easier handling and superior shipping protection
- Belt and direct drive units are available
