ECHELON™ SERIES PACKAGED UNITS

13-16 SEER, 2-5 TONS

HEATING & AIR CONDITIONING

Echelon™ Series Packaged Units

Comfort you can count on.

Creating a comfortable environment takes rugged technology that can deliver the performance you demand day after day, season after season. You can count on Coleman® for energy-efficient operation that meets your needs quietly and reliably.

Energy-efficient

With cooling ratings of up to 16.5 SEER, Echelon™ Series Packaged Units save the most money in extreme conditions. Energy costs can be cut by as much as 40% during the coldest and warmest months thanks to features like our ECM motor technology, enhanced coil design and thermostatic expansion valves.

Quiet by design

WhisperDrive™ The entire line of Echelon™ Series Packaged Units is designed to operate quietly. Our WhisperDrive™ swept-wing condenser fan minimizes the air noise coming from the unit. A ridged top panel and embossed side panel architecture reduce vibration. The enhanced coil fin and rubber isolated compressor reduce radiated sound.

Easy, space-saving installation

All Coleman® Echelon™ Series Packaged Units are designed to save space. They feature a compact cabinet design with a single footprint for all models. The removable base rails provide a quick and simple option to ease installation when space is tight. Plus, a convertible airflow design requires no panel cutting for maximum flexibility.

Performance

EcoTrak™

With our exclusive EcoTrak™ technology, installers can select an operating cycle that performs best for your particular climate—whether dry, temperate or humid. And variable-speed motor technology provides modulating airflow, increasing energy-efficiency, comfort and humidity control while reducing sound.

Quality that lasts

Before any Coleman® unit leaves our laboratory, it undergoes strict component selection and rigorous testing. State-of-the-art computer evaluations during manufacturing ensure every unit is built correctly. All electrical and mechanical components are operated and validated on our assembly line and then backed by a factory warranty for a worry-free system.

Eco-friendly

Coleman® products utilize R-410A, a new-generation refrigerant safer for the ozone layer—it absorbs and releases heat more efficiently so compressors run cooler. The result is a superior efficiency rating, reduced energy use and less impact on the environment.

No matter where you are, there's a Coleman® Echelon™ Series Packaged Unit designed to deliver exceptional comfort in your unique climate. Each self-contained unit is installed outdoors, which saves you a substantial amount of indoor space. This rugged lineup includes gas and electric heat models and heat pumps, each with advanced motor technology and optional two-stage heating and cooling for quiet, efficient performance year after year.

Electric heating/electric cooling and heat pump models

- *Water-shed top panel protects against corrosion*
- *Single-stage or two-stage optional compressor operation for maximum efficiency (two-stage compressor operation only on select models)*
- *Weather- and fade-resistant powder-paint finish*
- *Removable base allows for flexible installation*

- *Top discharge carries noise up and away from building*
- *Reliable time and temperature controls protect against extreme conditions*
- *Externally mounted pressure ports mean easy maintenance*
- *Foil-faced insulation for improved indoor air quality*

Gas heating/electric cooling models

- *Single-stage or two-stage optional compressor for maximum efficiency (on select models only)*
- *All gas/electric models are available in either single- or two-stage heating*
- *Blow-through design with reliable aluminized heat exchanger*
- *Non-corrosive, self-draining condensation pan means longer life*
- *Fade- and corrosion-resistant steel cabinet*
- *Easy access control box*

- *An all-aluminum condenser coil utilizing MicroChannel Coil technology provides increased efficiency and long coil life (for Cooling/Gas Heat only). Copper tube/aluminum fin condenser coils on all dual fuel heat pumps.*
- *Aluminum fin and enhanced copper tube evaporator coils provide comfort and efficient operation*
- *High-grade, aluminized inshot burners need no adjustment*
- *Tough condenser coil guard protects against years of abuse*
- *Easy maintenance via self-diagnosis and customizable fan speed controls*

Not all products include louvered coil guards. See product technical guide for clarification.

Echelon™ Electric/Electric Packaged Units (DPX) (Two-stage cooling operation standard)

* Generation indicator

DYZ models meet or exceed ASHRAE 90.1-2007 Standards.

DYQ and DYX single-stage models meet or exceed ASHRAE 90.1-2007 Standards and are ENERGY STAR® qualified.

DPQ, DPX and DYX two-stage models are ENERGY STAR® qualified.

Warrantied for years of comfort

Every Coleman® system is backed by some of the best limited warranties available:

Warranties for electric/electric models DPZ, DPQ, DPX: 10-year compressor, 5-year electric heat, 10-year parts warranty (1 phase); 5-year compressor, 5-year electric heat, 1-year parts warranty (3 phase)

Warranties for gas/electric models DYZ, DYQ, DYX: 20-year heat exchanger, 10-year compressor, 10-year parts warranty (1 phase); 20-year heat exchanger, 5-year compressor, 1-year parts warranty (3 phase). Models DYZ, DYQ, DYX also have LoNox models available.

Warranties for electric/electric models BUZ, BUQ, BUX: 10-year compressor, 10-year parts warranty (1 phase); 5-year compressor, 1-year parts warranty (3 phase)
